PROFILE

Motivated and detail-oriented Software Engineering graduate with hands-on experience in full-stack software development. Skilled in PHP, Laravel, Java, Spring Boot, MySQL, and React.js. Eager to leverage academic background and internship experience to contribute to a dynamic software development team as an Software Engineer.

WORK EXPERIENCE

Software Engineer - Intern

12/2023 - 05/2024

Ceylon Linux (Pvt) Ltd

During my internship as a Software Engineer with a product-based software company specializing in Sales Force Automation Systems (SFA), I worked extensively on several projects including Darley Butler, Lakmee, Suwanda, NBC, JAT, and CW Mackie PLC. I demonstrated proficiency in full-stack software development, developing new reports and features to enhance data analysis capabilities. My contributions also include fixing issues, developing, and optimizing report exports, and improving functionality across various projects, showcasing my dedication to delivering high-quality software solutions.

Technologies Used: **Laravel, CodeIgniter, MySQL, Vue.js, Postman, GitLab, Linux environment.**

UNIVERSITY PROJECT

- Band Artist Management System (MHunter)**
Contribution - Implementation of Admin Functionalities
Technologies - **Java SpringBoot ReactJs MySQL CSS JavaScript**
Third Year Group Project
